- 8x NOC 24 V Relay Outputs
- 1x Slot for IF Module[1]
- Operating Range –40°C to +70°C
- 600 W Integrated Surge Protections

BOX Version

PCB Version

RE8.2 is an industrial module which can be easily adapted for a wide range of tasks. It can be used as IPLOG-G submodule or as standalone addressable module at MODBUS RTU bus.
RE8.2E is a cost-optimized version of RE8.2 without its own CPU. It can be used only as an IPLOG-G submodule.

ORDERING

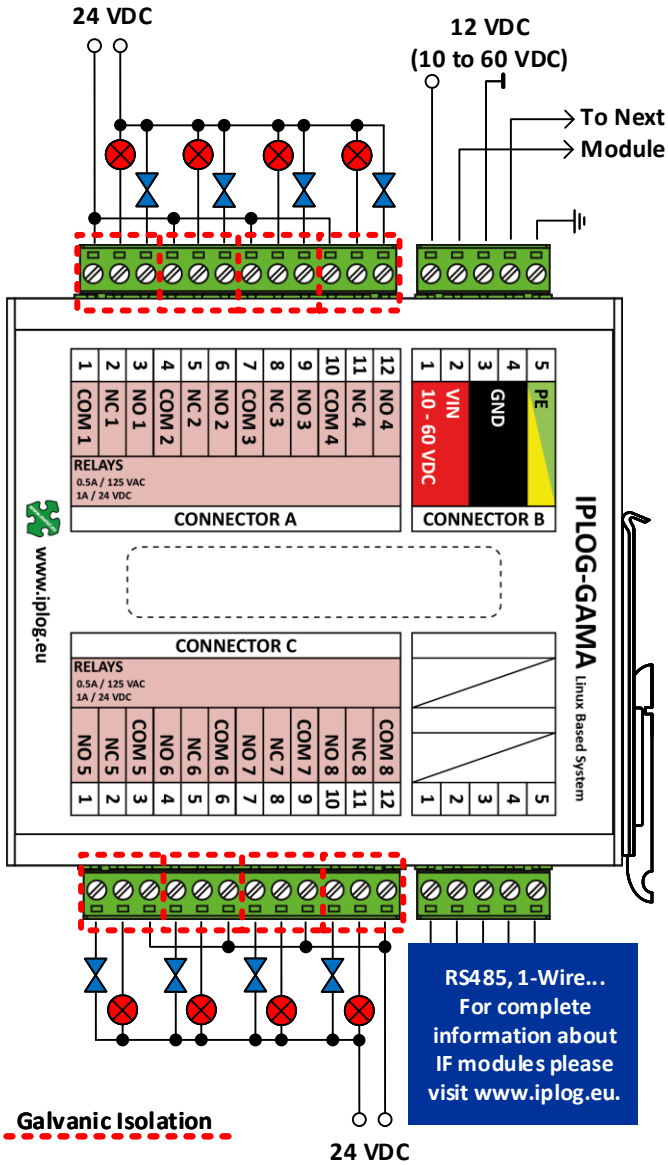
PRODUCT NAME	CODE	NOTE
RE8.2-01-BOX	5000-1001	2x RS485
RE8.2-01G-BOX	5000-1002	2x RS485 (isolated)
RE8.2-PCB	0000-1000	PCB Module
RE8.2E-PCB[2]	0000-0900	PCB Module
For a Full Range of Interfaces Please Visit www.iplog.eu.		

DEVICE

PARAMETER	VALUES	NOTE
Power Supply	12, 24, 48 VDC	10 to 60 VDC
Consumption	Max. 1.5 W	
Surge Protection	600 W	10/1000 µs
Operating Range	–40 to +70 °C	
Storage Range	–40 to +70 °C	
Humidity	Max. 95 %	No-condensing
Dimension	35 x 110 x 119 mm	W x H x D
Weight	Max. 0.38 kg	
Installation	DIN35 or Flat Surface	
Device Class	I	EN 61140
Ingress Protection	IP 20	EN 60529
Degree of pollution	II	EN 60664-1
Connections	Screw Terminals	
Conduct. cross-section	Max. 2.5 mm^2	

CPU

PARAMETER	VALUES	NOTE
Series	32-bit MCU	
Frequency	64 MHz	
Flash	512 kB	
RAM	64 kB	



Safety Precautions

If dangerous voltage is applied to the terminals, only personnel with appropriate electrical education may perform installation and servicing of the equipment. In the event of a fault, the device must be sent to the producer for repair. The device must be earthed in accordance with national standards. We recommend the manipulation of terminal blocks, only in the event they are not in the presence of dangerous voltage. Failure to comply with this recommendation may result in the risk of electrical shock.

(1) Does not apply to the RE-8.2E module.
(2) RE8.2E module is not possible to use as a standalone module. Module is designed only for installation on motherboard IPLOG-G1, G2, G2E and G3.

Location and Designation of Connectors and LEDs

NOTE: The order of the terminal numbers in the table below corresponds to the order of the terminal numbers found on the device.

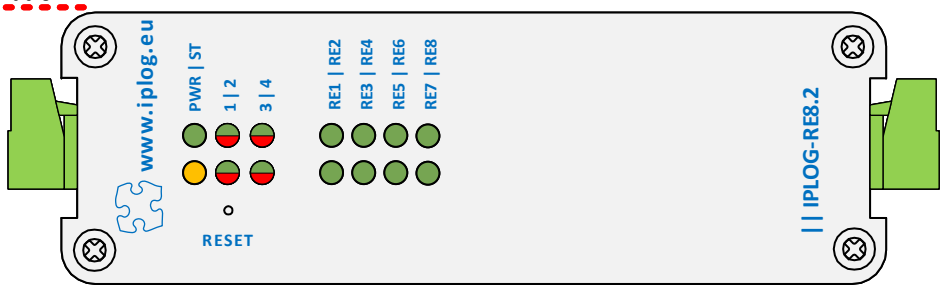
CONNECTOR A			LEDS	
12	NO 4	Normally Open	RE4	Closed = Log. 1 = Lights
11	NC 4	Normally Closed		
10	COM 4	Common Terminal of NOC Relay 4		
9	NO 3	Normally Open	RE3	Closed = Log. 1 = Lights
8	NC 3	Normally Closed		
7	COM 3	Common Terminal of NOC Relay 3		
6	NO 2	Normally Open	RE2	Closed = Log. 1 = Lights
5	NC 2	Normally Closed		
4	COM 2	Common Terminal of NOC Relay 2		
3	NO 1	Normally Open	RE1	Closed = Log. 1 = Lights
2	NC 1	Normally Closed		
1	COM 1	Common Terminal of NOC Relay 1		

CONNECTOR B			LEDS	
5	PE	Earthing Terminal		
4	GND	Power Input – Minus Terminals Terminals are Internally Interconnected	PWR	Power is Connected, LED Lights Up.
3				
2	VIN 10-60 V DC	Power Input – Plus Terminals Terminals are Internally Interconnected		
1				

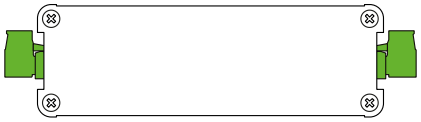
CONNECTOR C			LEDS	
12	COM 8	Common Terminal of NOC Relay 8		
11	NC 8	Normally Closed		
10	NO 8	Normally Open	RE8	Closed = Log. 1 = Lights
9	COM 7	Common Terminal of NOC Relay 7		
8	NC 7	Normally Closed		
7	NO 7	Normally Open	RE 7	Closed = Log. 1 = Lights
6	COM 6	Common Terminal of NOC Relay 6		
5	NC 6	Normally Closed		
4	NO 6	Normally Open	RE6	Closed = Log. 1 = Lights
3	COM 5	Common Terminal of NOC Relay 5		
2	NC 5	Normally Closed		
1	NO 5	Normally Open	RE 5	Closed = Log. 1 = Lights

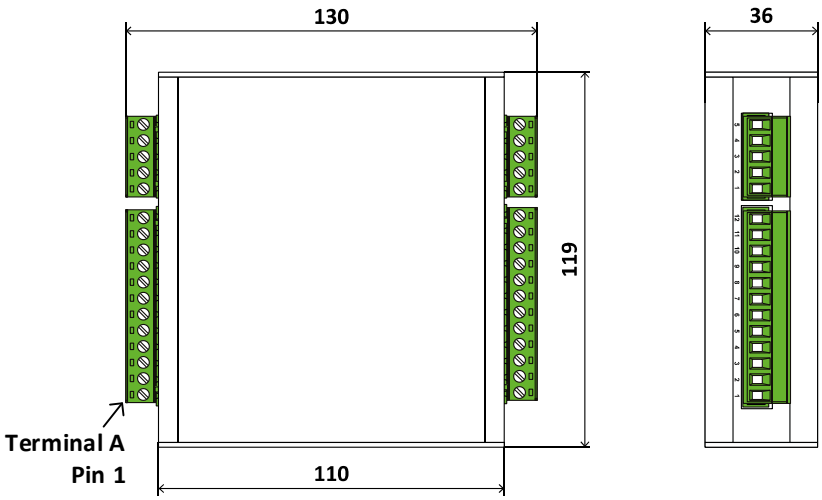
LED		LED	
1	BUS 1 (Tx = Red / Rx = Green)	3	IF05 Input BI1 Sabotage Short = Log. 1 = Lights
2	BUS 2 (Tx = Red / Rx = Green)	4	IF05 Input BI2 Sabotage Short = Log. 1 = Lights
Applies only to the RE-8.2 module, which can be used as a stand-alone IO module.			

Galvanic Isolation



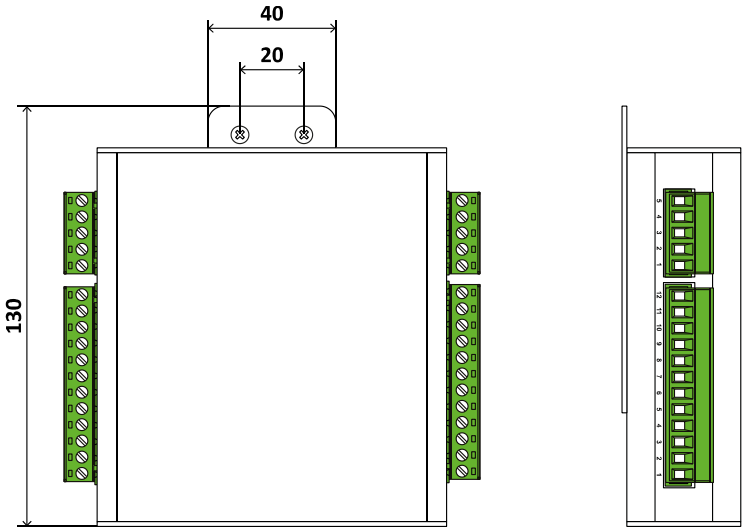
BOX Version Dimensions





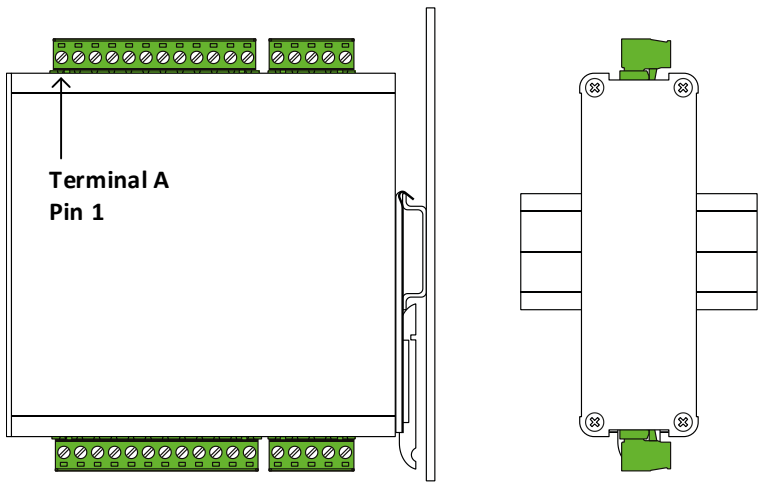
BOX Version Installation

Flat Surface



📖 For installation we recommend using M3 screws and a flat surface holder from accessories.

DIN35 Surface



📖 For installation we recommend using M3 screws and DIN35 holder from accessories.

Default Settings of MODBUS Communication

Device ID: **1** | Speed: **115 200** | Parity: **None** | Data bits: **8** | Stop bits: **1**

Modbus registers

	Subject	Type	R/W	Value	Offset
Device Identification	Product Type	u8[3]	R		1002–04
	Serial Number	u32	R		1005–06
	PCB Version	u32	R		1007–08
	PCB Revision	u16	R		1009
	FW Version Major	u16	R		1010
	FW Version Minor	u16	R		1011
	FW Version - Revision	u32	R		1012–13

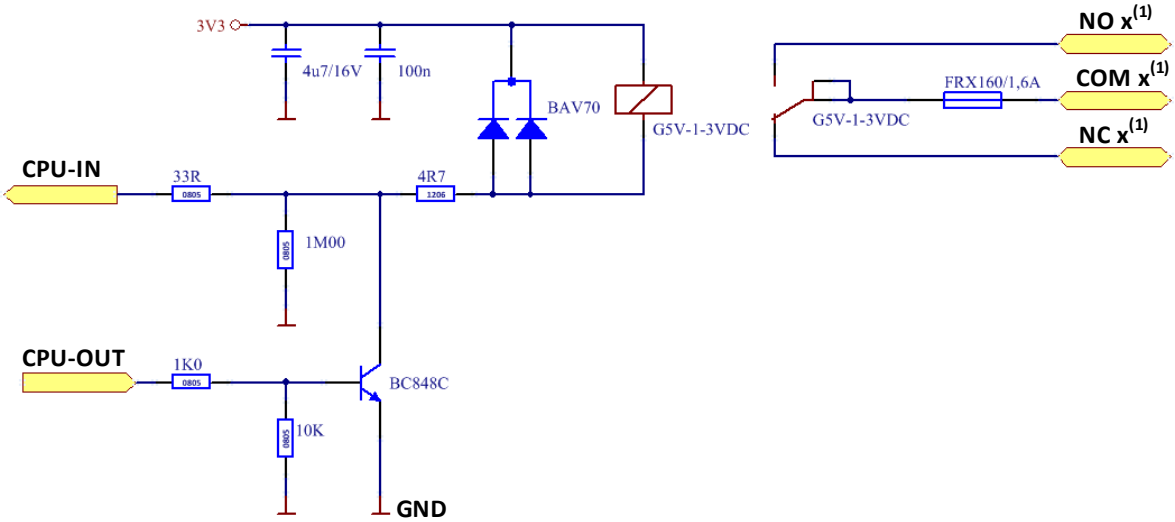
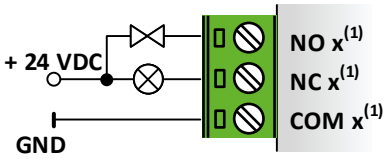
REVISION: 201807 - Default
201912 - Extension of modbus registers

Relay outputs are capable of switching loads with either AC or DC voltage. Relay Outputs are accessible from METEL IEC 61131-3 IDE or directly from Linux scripts and can be configured independently of each other. Logical state of each output is signalized by the relevant programmable LED diode on the front panel. For details please see the table „Location and Designation of Connectors and LEDs “.

Internal Connection



Examples of Connections



Relay NOC (Changeover) output has a common terminal COM. The two state relay can switch both AC and DC voltages to load. In the non-voltage state are relays terminals NO x(1) – COM x(1) disconnected and NC x(1) – COM x(1) connected. The relay is turned on when program set logic 1 at its coil. When the relay is turned on, corresponding REx(1) LED diode on the front side lights up (in default configuration).

Relay terminals must be protected with an external circuit breaker or fuse to prevent the rated current of the terminal or the load being exceeded. When switching inductive load it is recommended to protect relay outputs with an appropriate external component (e.g. varistor, RC circuit, or diode).

Technical Parameters

Parameter	Value	Note
Contact Type	NOC	Changeover Relay
Number of Poles	1	
Max. Load	0.5 A / 120 VAC	Resistive Load
	1 A / 24 VDC	Resistive Load
Electrical Lifetime	3,000,000 Operations	
Isolation Voltage	1.000 Vrms / 1 min.	Terminals to Electronic or Case

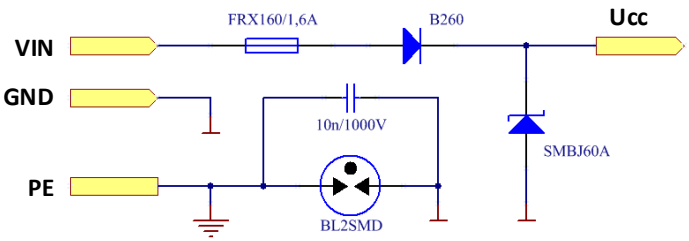
(1) The letter „x“ replaces the output number.

The PE terminal must be earthed according to the applicable standards in the country of installation. Correct grounding protects personnel against electric shock and improves device immunity from interferences. If dangerous voltage is applied to the terminals, only personnel with appropriate electrical education may perform installation and servicing of the equipment. Before any manipulation with the device, including disconnecting and connecting the terminals, the dangerous voltage must be disconnected.

POWER INPUT

The supply voltage is connected to VIN and GND terminals. The terminals are doubled for easier connection between the modules installed side by side.

Internal Connection of POWER INPUT



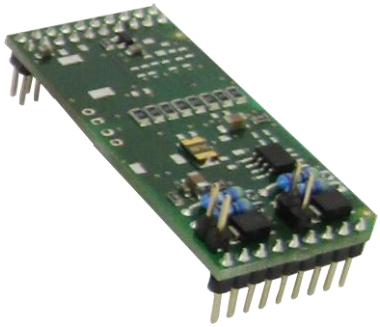
🕮 The cover of the device is galvanically connected to the PE terminal which is galvanically isolated from the device electronic. It allows the user to use the device even in systems with a grounded + pole.

Parameter	Value	Note
Input Voltage Range	10 to 60 VDC	
Surge Protection	600 W	10 / 1000 µs
Short Circuit Protection	Polyswitch	
Reverse Polarity Protection	Diode	

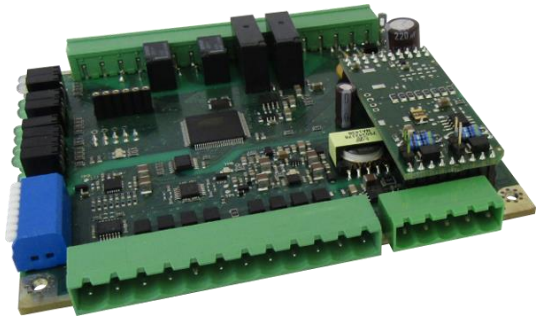
IO modules include one IF slot which can be used for IF modules. The main purposes of the IF modules are to provide:

- ❖ RS485 connectivity if the IO module board is used in the standalone addressable IO module communicating with PLC via the RS485 bus
- ❖ Provides serial interfaces for communication with other systems
- ❖ Additional inputs and outputs into system

Standalone IF Module



IF module Installed on a IO Module



🕮 **IF modules must be plugged into the IF slot when the power is turned off. After, the power is turned on the new IF module is automatically detected.**

🕮 **When ordering, we recommend using the online configurator available at www.iplog.eu.**

Overview Table of IF Modules

ORDERING NAME	DESCRIPTION	CONNECTOR D 1	2	3	4	5
IF-01	2x RS485	A1+	B1-	GND	B2-	A2+

IF-15G	4x OC (NPN) OUTPUTS ISO	ISO OC 4	ISO OC 3	GND-ISO	ISO OC 2	ISO OC 1
IF-18G	1x LORA-EP1, 1x RS485	A+	B-	GND-ISO	Tx/Rx	VCC

(1) Alarm / 5V Digital Inputs. It does not apply to combination with the BI-8.1 module, where they only work as digital.

ISO = Isolated, TBD = To be Determined

IF- That way labeled IF modules are suitable for standalone IO modules. They are always connected to a PLC or LAN-RING switch via the RS485 bus.

🕮 **Into RE8.2E module is not possible insert IF module.**
